

Catalyst Web Applications

ACQUIRE™

Acquire™ is a premier, comprehensive learning management system designed specifically for the changing needs of a distance education school. On the right are the many features of Acquire™ which make it not only a conducive learning tool for students, but also a valuable resource for streamlining student tracking for administrators. In addition, Acquire™ is the on-line interface for educators to grade coursework and communicate with their students.

Catalyst will talk with your staff about the specific needs of your students and employees and customize Acquire™ based on your education model and needs. The features listed are only a spring board to what your system can become. As your student population or state legislation requirements change, Acquire™ will change with you.

For a real-time demo, contact us at the phone number or e-mail address below.

'The change you've been looking for'

- ☞ State attendance reporting
- ☞ Student financial register
